

Quality Assurance Technician

Reporting to the Operations Manager or designate, the Quality Assurance Technician will provide critical lab testing support both for incoming product with primary focus on procedures/standards and document analysis. The Quality Assurance Technician will support with sample testing in IGPC's Corn Receiving Area and laboratory testing required for ethanol and co-product production.

The successful candidate will operate all lab equipment and must comprehend the importance of adhering to our Quality Assurance Program. This position also plays a key role in IGPC's customer service team by interacting with customers and suppliers in the corn receiving area.

Minimum Qualifications and Skills Qualifications

- Must be a minimum of 18 years of age.
- University Degree or College Diploma in Chemistry, Microbiology, Environmental Sciences, or other related fields.
- Must possess the appropriate technical knowledge to maintain and operate all lab equipment and ensure adherence to our Quality Assurance Program.
- Ability to work rotating shifts (day and afternoon shifts), including weekends.
- Demonstrated:
 - effective communication and organizational skills,
 - a keen interest in learning all lab equipment,
 - a strong learning capacity and attention to detail,
 - comprehension in the importance of adhering to our internal Quality Assurance Program,
 - teamwork and problem-solving skills, and
 - proficiency in all forms of written communications.
- Proven positive attitude
- Excellent multi-tasking, organizational and work prioritization skills.
- Fluent in the use of Microsoft Word, Excel, and Outlook.
- Previous customer service experience is an asset.
